

The 6 Skills Every New Trader Needs

Foundational Trading Academy

YOUR NAME

DATE

Fill this in as you watch. Click any field to type directly.
This workbook follows the masterclass presentation — one section per phase.

This workbook is designed to keep you engaged while you watch the masterclass.

Each section maps to a phase in the presentation. Fill in as you go.

Fill-in-the-blank

Key concepts are blanked out — listen and fill them in as I teach. This keeps you actively processing, not passively watching.

Reflection prompts

Short questions that ask you to connect the idea to your own experience. No wrong answers — just think and write.

Quick checks

Checkboxes to confirm you understood the key takeaway before moving on.

Action plan

At the end, you'll build a personal next-steps plan based on everything you learned.

Tip: Pause the video if you need more time. There's no rush. The goal is understanding, not speed.

Fill in the blanks as you watch:

The market has two modes:

1. Risk-On means money flows toward
2. Risk-Off means money flows toward

Fill in the indicators for each environment:

Risk-On

SPY:

Volatility (VIX):

Leaders:

Risk-Off

SPY:

Volatility (VIX):

Leaders:

Based on what you see in the markets right now, which mode do you think we're in? Why?

☐ I understand: the first skill isn't finding a trade — it's reading the environment.

Fill in as you watch:

Support is a price level where

Resistance is a price level where

These levels exist because

Fill in the blanks:

A zone forms when

The zone is defined by the candle's

, not the

When price breaks through resistance, what happens to that level?

Think of a stock you follow. Can you identify a support or resistance level from memory?

Ticker:

Level:

Support or Resistance?

☐ I can see the invisible architecture of a chart — support, resistance, and zones.

Fill in each timeframe's role:

Weekly:

Daily (anchor):

1-Hour:

Fill in:

When the daily is trending down but the 1H bounces, that bounce could be a

Alignment means the

sets direction and the

refines timing.

Have you ever taken a trade that looked good on one timeframe but failed? What happened?

☐ I understand: higher timeframes set direction, lower timeframes refine timing.

Every macro data point fits into one of three buckets. Fill in each:

Growth

What it measures:

Inflation

What it measures:

Liquidity

What it measures:

Fill in what each regime looks like:

Offense Mode — When all three align bullish:

Growth:

Inflation:

Liquidity:

Action:

Defense Mode — When all three align bearish:

Growth:

Inflation:

Liquidity:

Action:

☐ I understand: check Growth, Inflation, and Liquidity before forming a bias.

Fill in each component of a complete trade thesis:

Environment (risk-on or risk-off?):

Sector context:

Chart setup (pattern + level):

Timeframe alignment:

Macro backdrop:

Entry trigger:

Stop loss (and why):

Target (and why):

Collapse the above into 2-3 sentences — like you're explaining the trade to a friend:

☐

I understand: a trade without a thesis is a gamble. A trade with a thesis is a business decision.

What needs to happen for you to enter? What invalidates the trade?

If , then:

If it fails — specifically, if

then:

What would flip your outlook? What would you do differently?

If

then I would:

Entry price:

Stop:

Target:

Fill in the emotional stages every trader goes through:

1. (hint: first wins)
2. (hint: bigger positions)
3. (hint: first real loss)
4. (hint: trying to make it back)
5. (hint: wanting to quit)
6. (hint: if you have a framework)
7. (hint: journaling, routine)

What protects you from each trap? Match the antidote:

Overconfidence ☐

Revenge trading ☐

FOMO ☐

Despair ☐

Which stage of the emotional cycle have you experienced most? How will you handle it next time?

☐ I understand: the traders who survive aren't the smartest — they're the most self-aware.

You've touched all six phases. Now make it personal. What are you going to do with this?

What's the single most valuable thing you learned today?

Pick 1-2 concrete actions you'll take in the next 7 days:

☐

☐

☐

Which phase(s) do you want to explore further? Check all that apply:

- ☐ Phase 1 — Foundations (environment, risk-on/off)
- ☐ Phase 2 — Chart Reading (S/R, zones, patterns)
- ☐ Phase 3 — Connecting the Chart (multi-timeframe)
- ☐ Phase 4 — Macro Analysis (growth, inflation, liquidity)
- ☐ Phase 5 — Strategy & Execution (thesis, entries, risk)
- ☐ Phase 6 — Psychology (emotional cycle, discipline)

What habit or pattern will you let go of after today?

What new practice will you commit to?

This workbook is yours to keep. Come back to it.
Revisit your thesis template. Update your action plan.
Track how your thinking evolves.

The full FTA journey is a structured progression —
weekly live calls, personal support, and a community of traders at your level.
